Peter Tavy, Tavistock, Devon, PL19 9LS

Harford Bridge Park is a long-established family owned and operated holiday park set in Dartmoor National Park beside the River Tavy. It offers riverside and other spacious level camping pitches as well as self-catering caravan holiday homes, pods, a special Shepherd's Hut for "comfortable camping" and quirky 'Escape Pods' for two or more. All

the self-catering accommodation is available all year and all units are centrally heated with double glazing.

There is an abundance of trees, shrubs and hedging, which is a haven for wildlife including the free running park ducks. Dogs are welcome but must be kept on a lead and under control. We do have a 4-acre separate dog exercise field where they can run free.

### Delicious lunch or dinner at the dog-friendly Bedford Hotel

1 Plymouth Road, Tavistock PL19 8BB

The Bedford Hotel sits proudly at the heart of the award-winning Dartmoor market town of Tavistock. Birthplace of Sir Francis Drake, the town of Tavistock is steeped in history just waiting to be explored. You'll also find a town centre full of independent shops, a bustling pannier market, and a pretty park running alongside the River Tavy and the canal.

Step inside The Bedford Hotel and you'll find a welcoming bar, cosy lounges, and a very attractive oak-panelled restaurant.

The food at The Bedford Hotel is a delight, and has been recognised with awards from Taste of the West. A strong emphasis on local, seasonal produce, fine wines, warm hospitality and impeccable service.

### Fun outing with the dog to Brentor Church

North Brentor, Tavistock, PL19 0LB

Brent Tor is one of the most impressive rock outcrops in Dartmoor. With St Michael's Church at its top, it makes a distinctive and famous silhouette on the Dartmoor skyline.

The tor is unusual as it is one of the few on Dartmoor not to be made of granite. In fact, it is formed from basaltic lava which flowed some 350 million years ago into a shallow sea that covered the area during the Lower Carboniferous and Devonian periods. As the lavas flowed out into the sea some solidified into globular masses known as pillow lavas. Others were broken up by explosive contact with the sea water.
